

Nakai Zemer

Senior Data Analyst | Public Safety Analytics & Reporting

✉ n@kai.do 📍 Woodstock, GA 🔗 kai.do

SUMMARY

Data analyst with 8 years building and maintaining the incident reporting infrastructure for a large metro fire department, supporting ~800 users across ~70,000 incidents annually. Specializes in SQL Server, T-SQL, and SSRS report development, with statistical modeling and reproducible Quarto/R reporting delivered through independent consulting and 100+ personal R and SQL projects.

EXPERIENCE

Fire Data Analyst

— Cobb County Fire & Emergency Services

Sep 2022 – Present

- Primary support contact for ImageTrend RMS across ~800 department users, resolving 20+ tickets per month spanning data integrity, account access, report configuration, and analytical reporting
- Maintain the TeleStaff reporting layer and serve as the department's primary resource on its database schema; led the SSRS reporting cutover for TeleStaff's migration to Google BigQuery and Google Cloud
- Design and maintain 100+ operational and statistical SSRS reports supporting accreditation, fire, EMS, arson investigation, community risk reduction, and fire marshal operations
- Built an incomplete-report accountability system assigning responsibility to individual personnel with escalation up the chain of command, tracking active incompletes and completions
- Built a SQL Server database and SSRS reports tracking apparatus capabilities and assignments from a live CAD feed, delivered ahead of a department-wide apparatus reallocation; designed the schema and architecture for a related apparatus-assignment/GIS run-card prototype
- Designed and deployed a NERIS ImageTrend form with a versioned 52-page end-user guide; implemented the NEMSIS 3.5 PCR form
- Apply R for exploratory analysis and data cleaning in support of department reporting
- Leading an Azure Data Warehouse initiative — using Data Factory to join disparate databases and APIs into a unified schema, with AI vectorization tables, to modernize legacy SSRS reporting into Power BI

Founder & Data Science Consultant

— Kaido Analytics LLC (Remote)

Jan 2023 – Present

- Design and deliver reproducible statistical analyses and reports in R and Quarto, including an annual benchmarking report built and maintained for a client over two consecutive years
- Apply regression, Poisson-based demand and forecasting models, simulation, Markov chain models, optimization, and machine learning to real-world problems with complex, imperfect data — end to end, from data cleaning through client-facing reporting

Fire Data Technician III

— Cobb County Fire & Emergency Services

Dec 2019 – Sep 2022

- Introduced R and RStudio for advanced analysis, managed R projects with Git and GitHub
- Added ~40 SSRS reports (~131 total), integrating multiple data sources and calculations

Fire Data Technician II

— Cobb County Fire & Emergency Services

May 2019 – Dec 2019

- Built complex T-SQL queries, views, and data marts across Oracle, MariaDB, and SQL Server
- Created ~58 SSRS reports (~91 total) for operational and administrative needs

Fire Data Technician I

— Cobb County Fire & Emergency Services

Aug 2018 – May 2019

- Administered ImageTrend Elite forms and validations for fire/EMS reporting and user support
- Developed SQL for SSRS and Excel reports and managed SSRS projects in Visual Studio with Azure DevOps

Independent IT Contractor

— Various Clients (Canton, GA)

Feb 2015 – Aug 2018

- Supported servers and infrastructure for small and mid-sized businesses as a contractor
- Built and maintained an HTML5/CSS3 website and webstore for a CNC manufacturing start-up

SKILLS

R & Analytics R (8 yrs, 100+ projects), Quarto & R Markdown, Shiny (incl. shinylive), tidyverse & data.table, ggplot2, plotly, leaflet, rvest (web scraping)

SQL & Reporting Microsoft SQL Server, T-SQL, SSRS paginated reports, database design & normalization, data marts, indexing & performance tuning

Statistics & Modeling Linear & logistic regression with diagnostics, ANOVA & non-parametric methods, Poisson models & anomaly detection, time-series forecasting (fpp3), applied ML (XGBoost, random forest), mathematical modeling

GIS & Spatial Spatial analysis in R (sf), OSRM routing & travel-time analysis, census data (tidycensus) & geocoding

Platforms & Tooling Azure DevOps, Git & GitHub, CI/CD, Docker, Power Platform (BI, Apps, Automate), SharePoint administration, Python, applied LLM use & prompt engineering

EDUCATION

Kennesaw State University

BS in Mathematics (Statistics Concentration); Minor in Data Science and Analytics — 3.95 GPA

Jan 2022 – Present

Chattahoochee Technical College

AAS in Cybersecurity

Jan 2016 – Dec 2018

PUBLIC SAFETY DOMAIN

ImageTrend Elite (NERIS, NEMSIS 3.5, custom forms), PremierOne CAD, TeleStaff
